01 Introduction

Welcome to the BuzzAngle Music 2018 Year-End Report

Welcome to BuzzAngle Music's 2018 report on U.S. music consumption.

For the second year in a row, overall consumption growth was up double-digits. 2018 total consumption showed a 16.2% increase over 2017, which we showed last year to be up 12.8% over 2016.

On-demand audio stream consumption continued to fuel the overall growth, increasing 41.8% to 534.6B streams, up from 376.9B streams last year. Total on-demand streams, including both audio and video, topped 809B for the year. In the fourth quarter of 2018, a dominant 85% of all audio streams were subscription-based.

The # of unique titles audio-streamed in 2018 totaled 3M more than in 2017, a 9.2% increase. Consumers are exercising their choice to explore new music, which is a terrific sign for the industry.

Album sales and song sales continued to decline, 18.2% and 28.8% respectively, and physical sales declined 15.3%. Vinyl sales continued to grow with an increase of 11.9% over 2016.

The BuzzAngle 2018 U.S. music report is filled with many more stats on consumption. We hope you enjoy it and we welcome any feedback.

Best wishes for a healthy, happy and prosperous 2019!

CEO

Calculation Notes

- The 2018 measurement period is 12/29/2017 through 12/27/2018
- The 2017 measurement period is 12/30/2016 through 12/28/2017

Album Consumption is calculated as follows:

- Total Album Project Units (Audio Streams) = Album Sales + (Song Sales/10) + (On-Demand Audio Streams/1500)
- Total Album Project Units (Total Streams) = Album Sales + (Song Sales/10) + (On-Demand Audio Streams/1500) + (On-Demand Video Streams/1500)

Song Consumption is calculated as follows:

- Total Song Project Units (Audio Streams) = Song Sales + (On-Demand Audio Streams/150)
- Total Song Project Units (Total Streams) = Song Sales + (On-Demand Audio Streams/150) + (On-Demand Video Streams/150)

Album Sales Weighting:

- BuzzAngle Music does not provide any weighting factors on the physical album sales market. All units are exactly as reported from the retailers.

Retailer/DSP Reporting Notices:

- Tidal stopped reporting their streams at the end of July, 2017.

Release Period Category Definitions:

- New: Releases up to 8 weeks old
- Recent: Releases greater than 8 weeks old and up to 78 weeks old
- Catalog: Releases greater than 78 weeks old and up to 156 weeks old
- Deep Catalog: Releases greater than 156 weeks old

About BuzzAngle Music

BuzzAngle Music's charts and analytics offer data at a much more granular level and in a timelier manner than the most commonly used measurement of sales and streaming available up to this point, leading to an ability to produce trillions of unique charts daily, revolutionizing a slow, staid and stale aspect of the music industry.

Data is updated daily to reflect the previous day's sales and streaming activity in both the United States and Canada.
